

Smart Arrow Board

An advanced traffic management solution designed to enhance safety in work zones and emergency response areas

FEATURES

- The system is equipped with 15 mpower® 7x3 lights for tricolor configurations, delivering intense, wide-angle illumination with 180° visibility and exceptional durability thanks to its rugged silicone lenses, or 15 nFUSE® 7x3 P lights for single and dual configurations and can be powered by the bluePRINT® control system for arrow-to-arrow syncing and audible alerts.
- The optional Zone Command AI Camera System utilizes artificial intelligence to identify approaching vehicles, assess their speed and calculate stopping distances. This enables the system to predict potential collisions and issue timely warnings to personnel.
- Upon the camera system detecting a vehicle on a collision course, the system can trigger visual and audible alerts, providing critical information to workers and emergency responders to take necessary precautions.
- Order as Arrow Board with bluePRINT® (allows for arrow-to-arrow sync and custom light configurations) or Arrow Board with bluePRINT® and AI Zone Command (allows for arrow-to-arrow sync, custom light configurations, audible alerts and AI Camera System components).

SPECIFICATIONS

Input Voltage Range	10-16 Vdc
Amperage Draw	28.5 amps peak
Total Switching Current	100 amps max
Operating Temperature	-40°C to +65°C / -40°F to +149°F
LED Color Capabilities	Single, dual, tricolor
LED Color Options	  
Dimensions	78" L x 42" H x 5.3" D
Mount Types	Truck or trailer
Certifications	MUTCD Compliant and Approved by the Florida Standard Compliant APL# 102-085-003 For certifications on the lights, visit our mpower® 7x3 and nFUSE® 7x3 P product pages
